	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-9 and 14-18, drawn to a diagnostic method for an electromechanical actuator (EMA), classified in class 318, subclass 565.
- II. Claims 10-13, drawn to a pseudo-steady state operating condition of an EMA, classified in class 318, subclass 583.
- III. Claims 19-27, drawn to EMA subsystem, classified in class 318, subclass 15.
- IV. Claims 28-32, drawn to a flying vehicle, classified in class 318, subclass584.

The inventions are distinct, each from the other because of the following reasons:

Inventions diagnostic method of the EMA, the steady state operation of the EMA, the EMA subsystem and the flying vehicle are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a flying vehicle (Group IV, the combination) does not require a specific diagnostic method of Group I or a pseudo-steady state operation of Group II or a specific EMA motoring

Application/Control Number: 10/807,645 Page 3

Art Unit: 2837

subsystem of Group III. The subcombination has separate utility such as the specific diagnostic method of Group I and the pseudo-steady state operation of Group II and the specific EMA motoring subsystem of Group III all can be incorporated into the EMA controller of a gantry control system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bentsu Ro whose telephone number is 571 272-2072. The examiner can normally be reached on WS08605.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571 272-2107. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
